

AdaptNET Programme (ERASMUS⁺)

Advertisement No.: 02(3/94)-2018-19/ 1727

Date: 10-03-2022

The AdaptNET, an EU funded collaborative project between four Indian institutions and four European institutions on “Strengthening research and education on climate smart crop development in India” at AAU, Jorhat, has called for concept notes on potential research projects on “climate smart crop development in India” from scientists and PhD research scholars of AAU, Jorhat. The concept notes will be peer reviewed and 6 - 7 scientists and 4-5 PhD scholars will be selected to present their concept note in the AdaptNET conference to be held in Goa during June 15 – 17, 2022. The proposals should have a strong scientific and applied foundation, and should preferably be multi-institutional and interdisciplinary, involving international and/ or national partners if the project demands such collaboration. The collaboration with Indian / European organizations of AdaptNET project (please visit AdaptNET website for institutions involved) may be considered. The proposal may be based on specific calls from any National / International funding agencies. The preference will be given to scientists and students who have already been trained in climate resilient agriculture under the AdaptNET programme. The concept note may be sent addressing the Indian Coordinator of the programme at dbt.necab@aau.ac.in on or before 20th April, 2022.

The TA and DA for participating in the conference will be borne by the AdaptNET project.
